CORE SKILLS

React.js / Next.js 13 & 14
TypeScript / JavaScript ES6+
Tailwind CSS / Bootstrap
React Query
REST API Integration
Zustand / Redux

WEB3 & SECURITY

Polkadot & Cardano
Wallet Integration
dApps / Smart Contracts
E2EE / SRP Auth

TESTING & TOOLS

Jest / React Testing Library
Lighthouse / Web Vitals
Figma → Component Build
Git / GitHub
Vercel / Netlify
Postman / VS Code

EDUCATION

BSc Computer Systems Engineering

University of Sunderland
Sep 2019 – Jan 2023

PROFESSIONAL SUMMARY

Mid-Senior Frontend Developer with 4 years of experience building scalable web applications and Web3 solutions across Nepal and the UAE. Specialises in React, Next.js and TypeScript, with hands-on expertise in Polkadot and Cardano ecosystems, dApp development, and E2EE secure cloud systems. Proven track record delivering SEO-optimised, pixel-perfect interfaces from Figma to production.

EXPERIENCE

Mid-Level Frontend Developer · Vola Solution Pvt. Ltd.

Feb 2025 – Present | United Arab Emirates · Remote

- Built and shipped client-facing web projects using React, Next.js 14 and TypeScript, translating Figma mockups into pixel-perfect, responsive components with reusable architecture and strict TypeScript typing.
- Integrated REST APIs using React Query, building custom hooks for data fetching, caching, and synchronisation; participated in code reviews, mentored junior developers, and contributed to feature scoping and planning.
- Built Web3 frontend features for Vola Wallet using Polkadot and Cardano — wallet connect/disconnect flows, on-chain data reads, and transaction signing for dApp and smart contract interactions.
- Implemented E2EE for a secure cloud drive covering encrypted file upload, storage and access; built passwordless login using Secure Remote Password (SRP) protocol, eliminating password transmission over the network.
- Optimised performance through React Query cache tuning, lazy loading, code splitting, and next/image for efficient asset delivery — improving page load times and Lighthouse scores.

Mid-Level Frontend Developer · Bidhee Pvt. Ltd.

Aug 2023 – Aug 2024 | Kathmandu, Nepal · On-site

- Led frontend development for furniturehub.com.np using Next.js 13, building core e-commerce features including product filters, search, infinite scroll pagination, and user authentication flows.
- Implemented SEO using Next.js 13 SSR and SSG for dynamic product pages, Open Graph metadata, and auto-generated sitemap and robots.txt — improving organic search visibility and page indexability.
- Used React Query for server-state management — configuring caching, background refetching and query invalidation — reducing unnecessary API calls and cutting load times by 30%.
- Built a consistent design system with Tailwind CSS, defining reusable component patterns, spacing tokens, and responsive breakpoints used across the entire platform.
- Coordinated with backend developers to integrate REST APIs, aligning on request/response contracts, handling error states, and ensuring consistent data flow across product listing, cart, and auth modules.

Frontend Developer · Saptacode Technology Pvt. Ltd.

Mar 2022 – Aug 2023 | Kathmandu, Nepal · Full-time

- Developed React.js web applications for enterprise clients including admin dashboards and marketing landing pages, focusing on clean component structure and maintainable code.
- Built and maintained reusable component libraries shared across multiple projects, standardising UI patterns and reducing duplicated code across the team's codebase.
- Integrated REST APIs into React components, handling data fetching, loading states, and error boundaries to ensure reliable data flow between frontend and backend.
- Translated Figma wireframes into clean, maintainable React components, working closely with designers for pixel-accurate implementation.
- Assisted senior developers in estimating and breaking down frontend tasks during sprint planning, gaining early exposure to Agile workflows and project delivery cycles.
